PROFESSIONAL PROFILE

Recent Bachelor of Science in Information Technology (Software Engineering) graduate with practical experience developing full-stack web applications and Android mobile applications through academic and personal projects. Passionate about building reliable software, solving complex problems, and developing clean, user-friendly applications. Strong understanding of object-oriented programming, database design, and software development principles. Eager to begin a professional software development career where I can continue learning while contributing to a collaborative development team.

EDUCATION

Bachelor of Science in Information Technology (Software Engineering)

Eduvos, Bloemfontein
2023 – 2025

Achievements

- Member of the Golden Key International Honour Society
- Class Representative 2025

Kalahari High School

National Senior Certificate
2018 – 2022

Technical Skills

Programming Languages

- Java
- PHP
- JavaScript

- HTML
- CSS

Database

- MySQL

Tools and Technologies

- Git
- GitHub
- Visual Studio Code
- Android Studio
- NetBeans
- WampServer

Development Concepts

- Object-Oriented Programming (OOP)
- Software Development Life Cycle (SDLC)
- CRUD Operations
- REST API Integration
- Database Design
- Responsive Web Design
- Version Control (Git)

Technical Projects

Zesty Wear SA – Full-Stack E-Commerce Website

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Developed both the front-end and back-end of the application using HTML, CSS, JavaScript, PHP, and MySQL.
- Designed and implemented a relational MySQL database to manage users, products, and orders.
- Built secure session-based user authentication and authorization.
- Implemented responsive web pages for desktop, tablet, and mobile devices.
- Created CRUD functionality for efficient product and order management.
- Applied clean code principles to improve maintainability and scalability.

WattWay – EV Charging & Load Shedding Mobile Application

Technologies: Java (Android), API Integration

- Developed an Android mobile application that helps users locate EV charging stations.
- Integrated APIs to display real-time load-shedding schedules.
- Applied object-oriented programming principles throughout the application.

- Designed intuitive Android user interfaces with smooth navigation.
- Implemented structured data handling for improved application performance.

Digital Insurance Management System

Technologies: Java

- Built a console-based insurance management system for storing and managing customer records.
- Developed a modular object-oriented architecture using multiple Java classes.
- Implemented input validation and structured error handling.
- Created logical workflows for efficient record management.

F1 Reaction Time Web Application

Technologies: HTML, CSS, JavaScript

- Developed an interactive web application that measures user reaction speed.
- Implemented event-driven programming techniques and DOM manipulation.
- Built responsive user interfaces with real-time reaction tracking.
- Focused on performance and user experience.

Personal Developer Portfolio Website

Technologies: HTML, CSS, JavaScript, GitHub

Portfolio: [Anje | Software Engineering](#)

- Designed and developed a responsive portfolio website showcasing technical projects and software development skills.
- Implemented mobile-first responsive design for compatibility across multiple devices.
- Structured reusable components using clean and maintainable CSS.
- Deployed the website using GitHub Pages.
- Created a professional platform to showcase projects, GitHub repositories, and technical skills.

Professional Skills

- Problem-solving
- Analytical thinking
- Teamwork
- Communication
- Time
- Adaptability
- Attention to detail
- Willingness to learn

Additional Information

- Language: Afrikaans and English
 - Valid driver's licence
 - Own reliable transport
 - Available to start immediately
 - Willing to relocate
